## Networking and Systems Administration

***“Reliable, productive systems are built on solid foundations.”***

From its inception, Britec Computer Systems has been connecting, integrating, and administering systems across Western Canada. We strive to provide the stability and security necessary for our clients to maintain their competitive edge.

Britec designs systems that not only meet your current needs, but that will grow with your company for years to come. Britec understands that stability is critical; our team of systems engineers and consultants will work with you to design and implement the best infrastructure for your business. We have several MCSE's (Microsoft Certified Network Engineers) to serve you. This certification ensures a high standard of excellence.

Britec installs, implements, integrates and administers networks in:

- Microsoft Windows 2003 and 2000 Server
- Microsoft Windows XP/2000/98
- Dell Servers & Workstations
- HP printers and print servers
- Wireless networks
- Novell Netware

To improve your network and application effectiveness, Britec has partnered with many leading-edge technology companies such as:

- Microsoft Corporation
- Sage Software: Sage Accpac and Sage BusinessVision
- Citrix Systems
- Oracle Corporation
- Trend Micro Anti-Virus Protection
- Veritas Backup software solutions

We improve your uptime and reduce your network problems with a pro-active approach to you network. By creating a long-term relationship with you, we target your bottom line by reducing costs and improving sales.

We pride ourselves in providing effective, efficient, and economical network solutions to your business objectives.
